

THE MOST COMMONLY ASKED QUESTIONS ABOUT

COLLOIDAL SILVER:

WHAT IS IT?

Colloidal Silver is a pure, all-natural substance consisting of sub-microscopic clusters of silver, held in suspension in pure water by the tiny electric charge placed on each particle.

WHAT IS A COLLOID?

A colloid is a substance composed of particles that are extremely small but larger than most molecules. These particles in a colloid do not actually dissolve but remain suspended in a suitable liquid. All living things exist in the colloidal state. Most over-the-counter medications are in a crystalline state. Before any medication can be used, the body must convert it from a crystalline state to a colloidal state. The body can more readily use medications already in the colloidal form, as opposed to the crystalline form.

WHAT DOES IT DO?

Colloidal Silver is a powerful, natural antibiotic. It is the most useable form of the most effective disease, germ, virus, and fungus killer there is. It has been found to be both a remedy and a prevention for colds and flu, all infections, and all fermentation due to any bacteria, fungus or virus, especially staph and strep, which are often found in diseased conditions. It has been reported to rapidly subdue inflammation and promote faster healing. The body needs Colloidal Silver to fight disease-causing organisms, and to aid healing. Taken daily, it is like having a second Immune System, resulting in more energy, vitality, vigor, relaxation, faster healing and reduced bodily toxins. An antibiotic kills perhaps a half-dozen different disease organisms, but Colloidal Silver is known to be successful against over 650 diseases without any known harmful side effects or toxicity to the body. Dr. Harry Margraf of St. Louis says, "Silver is the best all around germ-fighter we have".

SILVER IN OUR BODIES?

We get silver and all minerals in the body through the food we eat. This comes directly from organic soil. This soil is rich in living organisms. These organisms break down the soil so plants are provided minerals in a form assimilable to the plant. Hence we get silver naturally from the minerals present in organically grown plants. If we eat plants that have been grown on chemical fertilizers, as most plants are grown today, without living organisms in the soil to help provide nutrition to the plant, we do not get the quantity of vitamins and minerals which are available in organically grown foods. Thus, deficiencies develop. As the tissues age, or, if we cannot assimilate silver for some reason, we develop a silver deficiency and an impaired immune system that can lead to cancer and other diseases. Some suspect a silver deficiency is possibly one of the main reasons cancer exists and is increasing at such a rapid rate today. Dr. Robert Becker noticed a correlation between low silver levels and sickness. People who had low silver levels were frequently sick, had innumerable colds, flu, fevers and other sicknesses. He said he believed a silver deficiency was the reason for the improper functioning of the immune system. He found that silver works on a wide range of bacteria, without any side effects or damage to the cells of the body, and can stimulate major growth of injured tissues.

WHY SILVER?

Silver has benefited mankind's health for thousands of years. In ancient Greece and Rome people used silver containers to keep liquids fresh. American settlers traveling across the West, often put a silver dollar in milk to delay its spoiling. Around the turn of the century doctors prescribed silver nitrate for stomach ulcers and it has been a common practice to put a few drops of a silver solution in newborn babies' eyes to kill bacteria that causes blindness. A silver compound known as silver sulfadiazine has been used in 70 percent of burn centers in the U.S. It also helps stop the herpes virus.

*Note: it is not the silver in dental fillings that is harmful but the mercury in the fillings.

WHAT IS THE HISTORY OF COLLOIDAL SILVER?

The uses of Colloidal Silver go on and on in medical journal reports. It was widely used 60 to 70 years ago when, among other reasons, the cost became prohibitive--about \$100 per ounce in 1930 dollars. Colloidal Silver, as it is now produced, is a redevelopment of an earlier cruder product that was first used in the early 1900's. It is now produced in a multi-million dollar facility at a much higher quality and at a fraction of the earlier price.

WHAT ARE ITS KEY CHARACTERISTICS?

Since Colloidal Silver is non-toxic, non-addicting, and has no known side effects, the body develops no tolerance and one cannot overdose nor do harm to liver, kidneys, organs or any part of the body. It is safe for pregnant and nursing women, and even aids the developing fetus in growth, health, as well as easing the mother's delivery and recovery. Colloidal Silver is tasteless, odorless, non-stinging, harmless to eyes (even in babies), contains no free radicals, is harmless to human enzymes, and has no reaction with other medications. It improves digestion. It has been known to cause rapid regeneration of damaged cells and tissue. It helps prevent colds and flu and all organism-caused diseases.

HOW DO I USE IT?

Colloidal Silver may be taken orally or topically, directly applied to the skin. It can be used vaginally, anally, atomized or inhaled into the nose or lungs, and dropped into eyes.

CAN I USE IT ON MY PETS?

Absolutely! It is safe to use on your pets.

HAS IT BEEN MEDICALLY TESTED?

Yes! Colloidal Silver has been successfully tested at the UCLA Medical Labs, where it was antibacterial on every virus it was tested on.

WHAT DOES THE FDA SAY?

According to the FDA, Colloidal Silver may continue to be marketed and used as it was originally intended. Colloidal Silver exceeds FDA recognized standards.

DISCLAIMER: Neither Manufacturer nor Seller makes any claims as to any specific benefits accruing from the use of Colloidal Silver. Information conveyed herein is based on records and research for your information only and is not meant to imply that you will experience similar benefits or results. Any benefits or results derived from the use of Colloidal Silver are subjective due to variable individual health factors and metabolic differences which tend to make the formula more or less adaptogenic.
