

TOTAL EMF SHIELD (3500 sq. ft.) Total Shield. The "Total Shield" is designed to neutralize electromagnetic pollution found in our environment.

What is the «Total Shield»?

Total Shield is a multi-layer passive antenna size 30x30 mm, closed above the hologram.

Each layer is made in a special flat antenna array deposited on a polystyrene based

method of metallization. Lines antennas are made of silver, titanium, palladium and gold.

The crystal lattice of the antenna has the property to absorb and convert electromagnetic

energy into a form safe for humans.

- Model MG-03 is designed to protect against radiation from mobile communications,

and microwave ovens,

- Model MG-04 for televisions and computers, including LCD and plasma screens.

Profoundly mistaken, those who think that LCD and plasma screens "are absolutely

harmless. Clinical trials show that the magnetic field and in the whole energy-effects on

the human organism from these screens is 2 times higher than the usual ... What leads to

the conclusion of doctors, a violation of intercellular exchange and brings the body out of

balance. That such things!

Appearance Total Shield many people, especially the "experts" casts doubt on his ability

to protect people from harmful effects of radiation on the sidelines of the electromagnetic

flux. This is understandable, Total Shield works in the little-known until the interaction

of thin fields. We all know that man a long time used the properties of gravity, without

knowing its nature!

How effective is «Total Shield»?

Studies have shown that the use of Total Shield eliminates harmful effects on humans of

electromagnetic radiation. Total Shield only works when the device directly at the person

and the quality is not affected.

The effectiveness of the Total Shield conclusively confirmed by the following studies:

biological testing, laboratory testing and monitoring of experimental animals, an improved method bioresonance diagnostic method for gas-discharge

visualization

Korotkov, diagnosis according to the method of R. Voll, method of information notation, instrumental control.

Of the 15 PPE on the market, only 3 products have a federal sanitary-epidemiological conclusion, inclusive, and Total Shield. It established the price for bulk products is 150-

200 \$, and Total Shield is worth \$ 30-35.

They say that now you can buy any conclusions. Maybe some truth in this is. But Total

Shield with its many achievements simply do not need to "buy" advice! Total Shield, the

only products of similar purpose is included in the reference catalog "Protective" of the

Ministry of Labour and Social Development (Vol. 2, section 9.1 for 2004). It is obvious

that the Ministry of Labour would not recommend an untested device.

Total Shield is registered in the State Register of Inventions (patent RF _ 2192056 from

28.03.2001), and also has a federal certificate of conformity. Information on Total Shield

posted at the World Bank Technology (USA). Device Total Shield awarded the silver

medal at the exhibition in Nizhny Novgorod (2000), Croatia and Slovenia (2005), a gold

medal at the Exhibition of Economic Achievements Exhibition (2002) and exhibition in

Brussels (2004), Diploma in Cyprus exhibition "Archimedes (2004)

Overall, the efficacy studies (not just safety) Total Shield attended, and gave a positive

conclusion of the official 39 leading institutions and laboratories in Russia, Latvia, Uzbekistan, Belarus, Austria and other countries, including:

- Institute of Medicine;
- Federal Centre for Sanitary Inspection of the RF;
- Institute of Biophysics, RF;
- Clinic of St. Yohanessa in Salzburg (Austria).

None of the currently known devices such appointment even approximately has no such

recognition. You can get into the scientific debate about whether this is possible or not,

whether there are fine field or not, just "show off" ... Sober same people, estimating the

scale of recognition Shield Total, Total Shield buy and install it on a TV monitor, mobile

phone, microwave.

Total Cost Shield hundreds of times lower than the cost of restoring health. Total Shield will work at least 10 years if properly handled.

Total Shield - a real working device! But for those who are not 39 prisoners of leading institutions, can be an independent additional research. The easiest way to do it by the method of diagnosis of R. Voll, recognized throughout the world. And all of them will fall into place, will simply not argue about anything.

Effects of Total Shield on the value of EMR

Prior to working with the computer captures the state of the central nervous system and cardiovascular system of man - the operator PC. Then turn on the computer and an hour later measurements are repeated. Further, without a break in the work on the body of the monitor is fixed Total Shield and once again be measured. The difference in the data illustrates the effectiveness of Total Shield.
